The Compact version of the DFS has to be downloaded from the Compact Welcome disc into sideways RAM. Carry out the following:

Insert the Master Compact Welcome disc into the disc drive then:

CTRL BREAK (to clear)
*MOUNT <RETURN>
*LIB LIBRARY <RETURN>
*DISC <RETURN>
CTRL BREAK (install)

The DFS will now be installed in sideways RAM position 7 and will remain in the machine until the Compact is turned off.

NB If ROMs have been inserted into the machine it is possible that you will no longer have any sideways RAM left if link PL11 has been moved
